

## PHP Programmer/Analyst

Health Loyalty® has been a leading provider of marketing technology and services to the life sciences industry for almost 40 years. Through our offices in Montréal, Toronto, and Miami, we provide software and service solutions that help the industry manage interactions with stakeholders; improve sales and marketing processes; and identify opportunities for future growth.

Today, our three major SaaS solutions are ranked among the leading software applications used by life science marketers. Within three years of its Canadian launch, our HEALTH LOYALTY® Life Science Loyalty Cloud® has become the number one patient support program software in the industry, used to manage the treatment journeys of more than 1.3 Million patients. Our PharmaSalesSupport™ software is the life science industry's most comprehensive SaaS application for sample and promotional material deployment, and our OASIS® analytics dashboard helps the life science industry turn data into strategic business intelligence for more informed marketing decisions.

Our focus on the development of these leading edge technologies for the life science industry means that we are always looking for talented PHP Programmer/Analysts to join our development team. Being a PHP Programmer/Analyst at Health Loyalty means helping us to both continually improve these software offerings, as well as working with us to develop the new technologies that will help propel the life sciences industry in the future.

Here's what we're looking for in a PHP Programmer/Analyst:

### Education and Expertise

- Bachelor's Degree in Computer Science or related field
- Energetic and highly motivated
- Excellent written and verbal communications skills
- Excellent problem solving skills with great attention to detail
- Proficiency with:
  - PHP LAMP Programming
  - JavaScript (jQuery)
  - HTML/CSS and JS/AJAX/SOAP/BOOTSTRAP
  - MySQL and Relational Databases
  - Code Repositories (Subversion)
  - UX Design skill set
  - Building Professional Online Web Applications

## Skills and Experience

- Experience with IT and related technologies
- Experience with PHP (Object Oriented Programming)
- UNIX/Linux experience
- Knowledge of SDLC and Agile development methodologies
- Understanding of system requirement specifications
- Ability to create system documentation and validation documents
- Experience with E-commerce systems and their integration; CRMs; and unit/functional testing in PHP, are all assets that would be considered in evaluating potential candidates

Health Loyalty is an equal opportunity employer that welcomes applicants from diverse backgrounds and with non-traditional qualifications. In addition to a competitive salary and comprehensive benefits package, we offer a stimulating and challenging work environment, significant opportunities for career development, as well as a close-knit corporate culture that values inclusion, team work and dedication. From flex-time to corporate office lunch events, our goal is to provide our team with both an enriching work environment and a good life-work balance. We also welcome and encourage applications from people with disabilities. Accommodations are available on request for candidates taking part in all aspects of the selection process.

If you believe that you could thrive in our environment, and are interested in pursuing this opportunity with our firm, please email your résumé in complete confidence to [careers@healthloyalty.com](mailto:careers@healthloyalty.com).
